WORK EXPERIENCE

National Football League, *Los Angeles*
Media Operations Engineer   *06/2021 - 04/2024*

- Wrote Java code with Maven dependencies for a project that analyzed our storage system using getters and setters, tree maps and hash maps. It then produced a CSV that I presented to management summarizing where our storage inefficiencies lie.
- Conducted in-depth analysis and troubleshooting of Java application error logs to identify and rectify system anomalies, ensuring operational reliability.
- Produced and managed JSON configuration files to facilitate data interchange.
- Collaborated daily with developers and software engineers in a scrum format to create and modify workflows for our media asset management system, Reach Engine.

Spotify, *Los Angeles*
Media Manager   *03/2020 - 06/2021*

- Assisted with our local storage expansion for our new campus in Los Angeles. This required calculating enough storage for assets to live on premise for a calendar year.
- Crafted a streamlined workflow to facilitate deliveries from external partners, employing a blend of placeholders within our Media Asset Management (MAM) system that seamlessly integrated with the file transfer tool, Aspera ensuring efficient and reliable data transfers.
- Tailored user rights groups for six distinct studios, each with unique Access Control Lists (ACL) and clearance requirements, ensuring precise access management and security protocols were upheld.

Spotify, *Los Angeles*
Media Coordinator   *05/2019 - 03/2020*

- Provided maintenance for our studio computers, including facilitating upgrades, patching fiber and Cat6 connections, and seamlessly integrating all users onto our network and storage infrastructure.
- Served as support for all video and podcast editors on Mac OS with Adobe CC Suite and Pro Tools.

EDUCATION

Columbia College Chicago   *Bachelor's Degree*
